

Summary of the Needs Assessment

- 80% of the students felt comfortable going to talk to the counselor
- 89% of students felt like they could be seen by the counselor in a reasonable amount of time
- 71% of the students said they felt it was important to set goals for their future to be college and career ready
- 88% of the students plan on attending 1 or more years of college after high school
- 70% of the students felt stressed by academics and school.
- 51% of the parents felt that the most important thing a counselor can do is to prepare their child for college and career readiness

The data project will address reducing the stress level of the students and preparing them for graduation and post-secondary education.
